### **DETAILED ACTION**

#### Election/Restrictions

- Claims 24-27 are withdrawn from further consideration pursuant to 37 CFR
   1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 7, 2005.
- Applicant's election with traverse of Group I, claims 1-9, in the reply filed on April
   2005 is acknowledged. No grounds for traversal was presented by the Applicant.

Also, it is noted that claims 10-23 and 28 were previously withdrawn, in the reply filed on April 23, 2005, without traverse, from consideration. It is noted the April 23, 2005 Amendment was processed prior to the reply filed on April 7, 2005. The Examiner does not know why the 4/23/05 Amendment was processed by the 4/7/05 Amendment. Thus, overall, claims 10-28 are withdrawn from consideration.

Nonetheless, the requirement is still deemed proper and is therefore made FINAL.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carley et al, US 6,701,345.

Carley discloses a data entry device via a network connection, e.g. 135, a notification system, e.g. 410, 412, for selection of goods, e.g. medical records. Carley does not disclose the term accumulator. However, accumulators, along with sending orders in parallel or serial manner, permitting access, tandem browsing, a time period selected by an initial user, have been common knowledge in the art. To have provided such for Carley would have been obvious to one of ordinary skill in the art. The motivation for having provided such would have been implementing known technology as a substitute for other similar technology to design a layout of retail system.

- 6. Further pertinent references of interest are noted on the attached PTO-892.
- 7. Applicant's Information Disclosure Statement received October 1, 2001 has been reviewed. Noted attached PTO-1449.
